

Forever Multi-Maca®

Maca, also known as *Lepidium Meyenii*, is an annual plant that is cultivated in the Peruvian central highlands. The edible root, which resembles a radish, is a staple food for the local population.

Maca has been highly revered for over 2,000 years in Peru. According to legend, the Incan warriors ate Maca for strength and endurance before going to battle. The Spanish Conquistadors called it the “sex herb of the Incas.” Today it is known as “Peruvian Ginseng”. Modern studies suggest that Maca may promote libido, sexual potency and energy.

Women in South America have also used Maca for thousands of years to help maintain their stamina and handle stress. Peruvian women begin using Maca at age 3, and remain strong, fertile and productive, well into their later life. Maca may increase a woman’s libido, and should be taken daily for best results.

Forever Multi-Maca® combines legendary Peruvian Maca with other powerful herbs and select ingredients, to create one of the finest supplements of its kind!
